CASE NO 1.

The Blue Light Bedroom Encounter

It happened on a Wednesday night in the first week of July 1995. Douglas woke to find that he was strangely cold for some odd reason, even though it was the middle of summer. But when he opened his eyes and began to focus and become more awake he could feel waves of pins and needles sweeping through his whole body, he then realised that the covers on his bed were not there. The next thing Douglas felt was that his legs were beginning to float high in the air, but his body was still on the bed, with one of his legs higher than the other. A wave of pure fear went through him, he could feel a presence around him, watching him, but could not see anyone or anything. It was this initially feeling of being watched by something and being helpless, that made Douglas look for the covers, like a little boy scared on the dark and trying to hide from it.

Douglas was the same, he wanted to get the covers to make it go away, but he could not move he was paralysed. Although, he could still move by use of his eyes, which were of obvious no use in his aid for help. However, after a few seconds that felt like a life time to Douglas, he legs were lowered down onto the bed and he could move and grabbed his bed covers, at this time ~~there~~ was a aura of blue light that left his room. A couple of days later he woke at night again, to find that his breathing had changed it was much slower than usual and felt like he was not in control of it. He cannot remember anything else that might have happened to him that night as he presumed he had gone back to sleep.

The most common characteristics of a typical U.F.O./ Alien abduction are:-

- Sensing a strange presence in the room.
- Seeing unusual lights of some sort.
- Experiencing time loss.
- Finding inexplicable scars or marks on the body.
- Being terrified driving along on a road for no apparent reason, knowing that something is going to happen.

CASE NO 2.

A Special Area 51 Report

The mother of all bases and most inhospitable place on Earth is **Groom Lake Air Force Base**, which is situated in Nevada 120 miles North West of Las Vegas. Ufologists and the public have given this place a nickname which is Dreamland, and it not because dreams are made here. It is officially known as AREA 51, which came from, you guessed it a grid map reference number of America. At this place of America, millions and millions of dollars have been spent on land in the surrounding area by the good old U.S. government, in order to conceal it's location from Joe public. AREA 51 is home to Americans start of the art fighter aircraft technology such as the F-117 and the SR-71 and other reconnaissance aircraft which are based there. Other aircraft based there is the SR-72, V2, TR-34 and the latest Stealth project know as the "AURORA PROJECT", some UFO's have been seen at Area 51 and in different shapes and sizes.

One bizarre object is the triangular shaped UFO which looks like the Stealth planes that have been built by the U.S., many of these triangular shaped objects have been photographed and filmed which shows amazing acrobats and stunts that no plane on Earth can do. As they have the ability to stay stationery in the sky at low attitude and at high attitude without need of any deceleration, obviously these are not conventional aircraft. Meaning could these be made from you've guessed it U.F.O. parts that the America government have in their possess used to create technology inside AREA 51. Motion sensors near the base detect passing cars and are guarded by security 24 hours a day, who are known as the Cammo dudes because of their camouflage uniforms and unmarked cherokee jeeps. Warning signs will lead to an arrest at gunpoint, which is bad for anyone's health if you do decide to cross the line into the base. You will also get a friendly, visit from the town's sheriff of Rachel and a local jail fine for trespassing.

But that does not STOP Ufologists from looking and investigating into such a base.

The Bob Taylor Report

TYPE: CLOSE ENCOUNTER OF THE FOURTH KIND.
PLACE: LIVINGSTON, WEST LoTHIAN, DECHMOND, LAW FOREST,
SCOTLAND, UK.
DATE: 9TH NOVEMBER 1979

One morning like any other, sixty one year old Bob Taylor who worked for the forest department in the Dechmond Law Forest, was doing his daily tasks in the forest when suddenly, as he walked into a clearing in the forest there in front of him was a metallic domed shaped object. As Bob look at the shape in wonder, two metallic contraptions with small spikes, being the only way to describe them extended from the domed shaped object and rushed towards him. With the intent in pulling him towards the mysterious object, this is all that Bob Taylor can remember as he went unconscious a few seconds later. When he woke he found that as well as having a raging thirst that several hours had passed and the sun was beginning to set. As he made his way home, still unaware as to what had happened to him, he discovered that his trousers were in shreds when he got home.

This made Bob contact the authorities as he believed that he was abducted, anyway the police went to investigate the place were Bob had said, this abduction took place and they found strange markings on the ground near to where Bob was standing. These markings found could have been done by a machine or forestry equipment, which as the police put in their report is exactly what they were, making this the official so called explanation as to what happened to Bob Taylor that day. However, some people say that the police did ask the forestry department to examine there equipment they were all in perfect condition, hardly used as they were just bought a few days before.

They are other explanations some say that it could have been a mirage of the planet Venus, or that Bob Taylor had suffered a mild stroke of some sort, but Bob was never fitter for a man his age. Whatever happened that day is still a mystery.

LAMARKSHIRE UFO GROUP RESEARCH

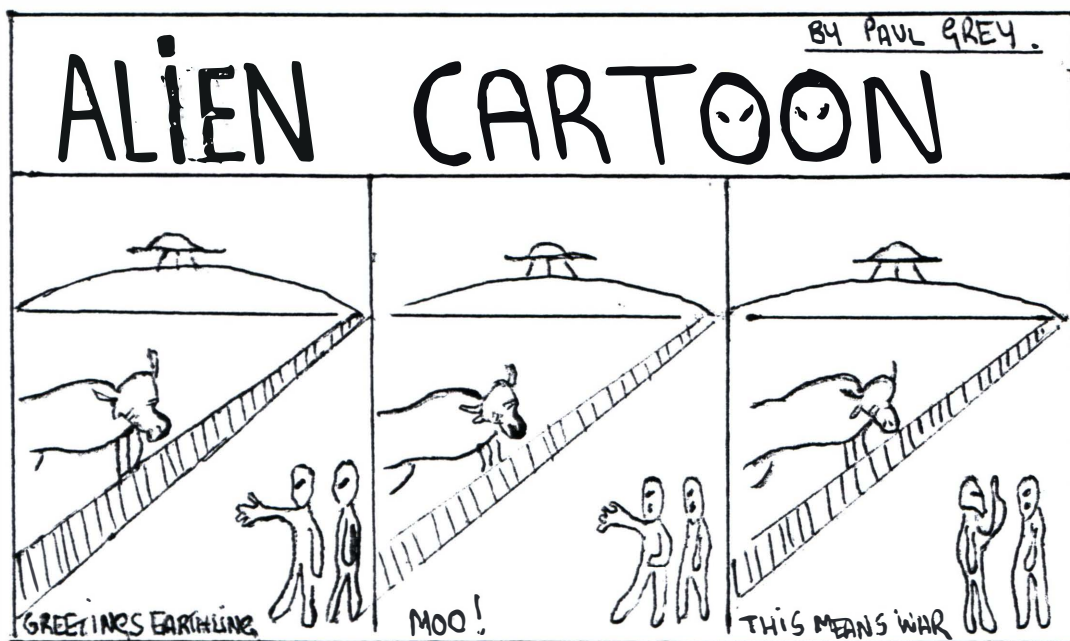

Peter's Personal Report.

If your looking for the answers to everything, then I'm afraid you won't find them in here. What we do hope to give people however, is other people views and opinions as well as our own. Whether it'll be Abductions, sightings or even the occasional mutilations then we would like to hear from you. Got a good story to tell? or do you have something strange happening? LUFOG would like to know about it.

We at L.U.F.O.G. are all perfectly sane normal individuals with an interest in UFO's we are just like everyone else only were looking for answers so why are they here? Okay you're probably heard so many stories by now, even after "Independence Day" people are asking if they are planning an invasion in the year 2000, but the bottom line is no-one outside of certain organisations has the true answers.

What I believe now is that there is a general release of information to the public so that when/if they make an announcement it will be greeted by a sort of "so what"/ tell us something we didn't know, reaction. In 1995 we had the Autopsy video. Fake? True? don't know. But it had the general public asking what if? this year 1996 we've had the a forementioned ID4 -again increasing public awareness, also the now infamous rock (ALH84001) from Mars which contained certain necessitates for life. what happens next year and the year after.

Also to members The cattle mutilations and the real X-Files SORRY they were cancelled. Also SORRY about the local social club meeting being cancelled as well.

Mark Jive Talking News Update

It's a very sad day when someone leaves a group and one of our individuals group members has decided to do just that. Now that Paul and Peter are doing all the research, David Liddell has decided to take a back seat because of personal interests, rather than investigate strange reports on the U.F.O.'s he has so come to a woman affections and seen the light as they say, poor chap. However, before leaving David always the sceptic did wish us all the best for the future for this newsletter, "Alien Optimum News". David who is a Bachelor of Science as mentioned was a wee bit of a sceptical about U.F.O.'s and thinks that U.F.O.'s were all caused by man made objects and not you know what.

Well thanks allot David for the one year research that you did. and so long Buddy!

This message goes out to all you camcorder junkies, we asking anyone who has any information or footage of the U.F.O. caught on video in Inverness during February sometime this year to please contact Peter or Paul as we both missed that one.

Going forward or back, I don't to this summer on the 7.7.96, Paul was out in his backyard of all places with his special yellow torch to do a bit of skywatching as you do. Anyway he was shining the torch up into the black star lit sky (yeah as if I do that, what an idiot if you ask me).

Anyway suddenly direct above him there was this amber light that was getting brighter and brighter and then it suddenly dimmed, (it could have been a street light, that's what I think). Paul thought to himself, that it was his torch acting up on him or playing tricks on him, (I don't about that, I think Paul was drinking that night). However, Paul decided to turn the torch off, but this didn't stop the amber light: returning and disappearing again, after a few seconds. So if Anyone seen this. amber light: on the same night, in a different part of the country or same part of the country then please contact Paul.

Another story from this summer was on the 23.8.96 at about 11.00 pm., Paul's cousin was watching Television and just happened to glance out of his house window and noticed what he initially thought to be an aeroplane flying past. The reason, for this was it look like any normal plane flying past with the usual aircraft lights flashing, he then realised that it must have been a U.F.O. because it started bobbing up and down while moving, not your usual aeroplane, unless it was a British Airways plane that is. Anyway he noticed this phenomenon towards a range of hills known as, "the Camspie Fells" and then disappear from site as if it was never there in the first place.

Yo hip More news update on U.F.O.'s and other topics in the next issue.
